※Sorry, Japanese

※ If you can not make appointments, don't hesitate to visit the Health Administration Center.

Special Health Checkup

We request your understanding and cooperation with the measures to combat the COVID-19 infection at the health checkup site.

COVID-19 has been found to easily spread from person to person in an enclosed space where many people take their meals and converse. The Gifu University will implement the following measures to prevent a COVID-19 outbreak at the health checkup site.

- ① To avoid congestion at the venue, keep strictly to your reception time, and follow the staff's instructions.
- ② Your body temperature will be measured at the reception desk (approx. two secs). At this time, please inform the staff if you currently have common cold symptoms. Individuals who have symptoms or a temperature above 37.5°C should go to the Health Administration Center counter. Your physical condition will be checked, and your health checkup shall be scheduled at a later date.
- ③ Your cooperation is essential to conduct this health checkup smoothly and quickly.
 - Please read carefully this venue map.
 - Please come to the venue with light belongings.
 - Please refrain from engaging in private conversations and cooperate so that the examination can proceed smoothly.
 - Stand in a line according to the mark on the floor.
- ④ Individuals from abroad who entered Japan within 2 weeks will not be able to have their health checkup today. Please proceed to the Health Administration Center counter.

Please consult with the Health Administration Center staff, if you have any other question.
